- ✧ This week **on the south side of Broad Street** water main installation advanced. Pressure testing and bacteria testing of the main was conducted and a large butterfly valve installed. Work will extend on this site until March 20<sup>th</sup>. The temporary east and west bound lanes are marked by toggle cones only. It is important to exercise caution and slow speed when driving through this zone.
- ✧ **The residents of King Street south of Broad Street** will be able to access residences this weekend by turning right off of Broad Street onto King Street. Thank you for your continued understanding of the situation.
- ✧ In the **block on King Street between Queen and Broad Streets**, please maintain only one lane of southbound traffic in this block. Vehicles may turn *right* only off of King Street onto Broad Street. There is NO left turn at this time. Trucks must detour away from this block by turning right off of King Street onto Queen Street or passing over King Street if already on Queen Street. Carriages must not use this block for safety's sake. Please turn left when exiting the City's Queen Street Garage.
- ✧ The new gas line is now completely installed in **the half block between 169-B King Street and Queen Street**. The granite curb for the handicap ramp is being installed at the northwest corner of the King/Queen Streets intersection. Water laterals and electrical conduit work is on-going. The bluestone crew is installing sidewalk at front entrances to stores first to restore easy access and then installation sidewalk bluestone.
- ✧ **Jacobs Alley** is open only for the weekend. This job will continue into next week as crews deal with unexpected issues involving sanitary sewer lines and stormwater lines.
- ✧ The status of **Tailor's Walk** remains the same as last week with intermittent closures next week.
- ✧ The work is completed **at 188 King Street**. A nearby light pole will be removed at a later time.
- ✧ The block **between Princess Alley and Fulton Lane** was saw cut this week. Next week, hardscaping begins with the old curb being pulled and the old sidewalk removed. Additionally next week at some point, Princess Alley at King Street will be closed to begin brick crosswalk work. Be prepared to proceed to Fulton Lane turning right to access the Victoria Center Garage.

*It may not come when you want it, but it is always on time.*
